

Claude Cowork and chat are now one Claude

You don't have to choose where a task goes. Claude does more of the work.

Starting today, Claude Cowork and chat are merging into one Claude. Bring a quick question, or hand over a report due at noon, and Claude takes it from there, even after you've closed your laptop. It's rolling out on Pro and Max plans over the next few weeks, with more plans to follow.

What Claude makes doesn't need its own place either. Claude Docs and Claude Slides are new today, and Claude Design now works inside your conversations too. Ask for a document, and you and Claude write it together. Ask for a presentation, and Claude drafts the slides. You can edit directly, present straight from Claude, or download as PowerPoint or PDF. All three are in beta on paid plans, and Enterprise admins choose when to turn them on. If you use Claude Design on its own, it keeps working as before.

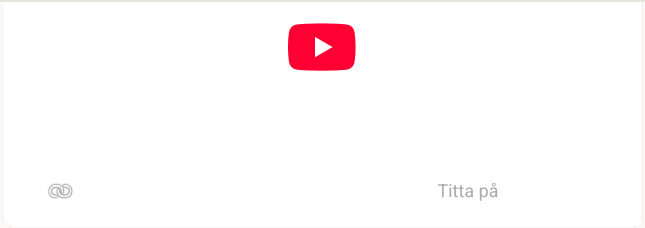

We built Cowork as a separate place for bigger work, and Design for visual work. People used both, and told us the frustrating part was deciding where a task belonged. What they'd started in one also didn't carry into the other. So we stopped making you choose. Claude can now figure out what a task needs, so what Cowork and Design can do is available from any conversation, with the context, skills, and connectors you already have.

> *"I could have Claude pull up [my legal research database], and it would pull all the cases, read them, figure out which other cases I might need, download them, and store them in a folder for my personal review." - Andrew Keller, Senior Economist*

What it looks like

A weekly report is due at noon. Before you head out, you ask Claude what moved in the pipeline last week, then add: "Write it the way we always do, flag anything that slipped, and put the highlights in five slides for the leadership meeting." If something's unclear, Claude asks. You can check progress from your phone on the way to the office. By the time you're at your desk, the report is waiting as a doc with notes from your teammate, and the slides are ready to open, adjust, and download as PowerPoint. Both came out of the same conversation, so the slides already match the report. You fix a line yourself, leave a comment for Claude on a slide, and share it. Schedule it for every Monday, and Claude starts on the report without being asked.

Anything you make with Claude Design, Slides, or Docs lives at one shareable link you can open on your phone. You can select an element and move it, or tell Claude what you want changed.

You can choose how Claude checks in with you. By default, Claude asks before taking an action. If you'd rather let it keep working and check in only when something needs a closer look, you can turn that on. You keep the final say.

Getting started

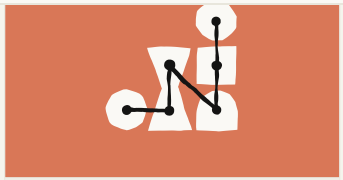

If you mostly use chat, you don't have to do anything different. When you want to hand over something bigger, try the next report or deck you'd normally build yourself. If you've been working in Cowork, everything is where you left it: your chats, projects, artifacts, connectors, and skills. When you open the app, pick up where you left off.

This is rolling out to Pro and Max plans first, in the Claude app on web, desktop, and mobile over the coming weeks to existing and new users on these plans. There's nothing to turn on. Team and Free plans will follow soon, and Enterprise admins will hear from us at least 30 days before anything changes for their organizations.

The full list of capabilities is in the Help Center. If you've been saving up a big messy project, now's the time.
